Heliverse

REACT NATIVE TASK:
Create 3 Screens according to this:
Video: Expected Output Reference

1. **Screen 1:** The screen 1 shown in reference video contains a **3 second timeout** after that the screen will navigate to Screen 2 (note ignore the curtain opening in screens)
2. **Screen 2:** The screen 2 shown in reference video has an **animation** on top user Profile which shows user comes in from right; and goes out to left on pressing the arrow shown at bottom, also after a timeout of **20 seconds** the screen will navigate to 3rd screen.
3. **Screen 3:** The screen 3 shown in the reference video starts a count from 15000 and increases to 40000 as shown; also on pressing the arrow the user will navigate back to screen 1.
